## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see page 13, filed 10 February 2006, with respect to claims 1-8, 14-17, 46-52, and 58-60 being generic to both Species I and II, have been fully considered and are persuasive. The previously withdrawn claims (11-13 and 55-57 before renumbering) have been rejoined.
2. The amendment filed 10 February 2006 overcomes the Section 112 Rejection set forth in paragraph 3 of the Office Action dated 10 November 2005 regarding claims 61-68, and has been withdrawn.

### ***Reasons for Allowance***

3. The following is an examiner's statement of reasons for allowance: The prior art does not disclose or make obvious a current aperture transistor with a portion of the channel region comprising a hybrid layer, and wherein a portion of the channel region through the current aperture comprises a vertical portion and a horizontal portion.
4. The closest prior art not made of record is Blackstone (US 5,416,354). Blackstone discloses a structure with an air gap (Fig 23 item 472) and a current aperture (N<sup>+</sup> regions bounded by items 468 and 470). The channel region does not comprise horizontal and vertical portions, nor does the structure include the layers or cantilevers specified by independent claims 8 and 18 (before renumbering).
